

# Agenda

- ▶ Who we are
- ▶ What is Microsoft Teams?
- ▶ Why use Teams as a learning platform?
- ▶ Challenges and possible solutions
- ▶ Live demonstration
- ▶ Give it a try!
- ▶ Questions
- ▶ Contact us

# Who are we?

Danish company with worldwide operations and offices in 7 locations

Microsoft Gold Partner and Strategic ISV (Independent Software Vendor)

Develop learning solutions on the Microsoft platform since 2003

Just another web conferencing tool

It allows me to store and share files

It's a collaboration platform

It's a chat

It's a hub that allows me to connect all my business apps

I don't know but I use it everyday to stay connected!

**“** Every individual is different, and so is the case with every team

- *Satya Nadella*, Microsoft CEO

# Users first, where do they live?

## Maximize the impact of your learning program

**ROI measurement** of learning program:  
Adoption, Participation,  
Outcomes

Teams is a platform that team members **access daily** to do their business

Learners see available and required learning in a persistent way  
**(Participation)**

Learning is a process that needs to be embedded in daily business activities, not a destination activity.  
**Learning in the flow of work**

Teams allows organization to maximize the efficiency of your learning programs  
**(Adoption)**

Learners are encouraged to collaborate and use learning outcomes within the same environment  
**(Outcomes)**

# Challenges

1

Consistency and **quality of learning content** across the organization

2

How can I **ensure compliance** with regulatory obligations?

3

Accommodating for **different learning methods** (online, classroom, webinar)

4

**Measuring the efficiency** of learning across teams and the organization?

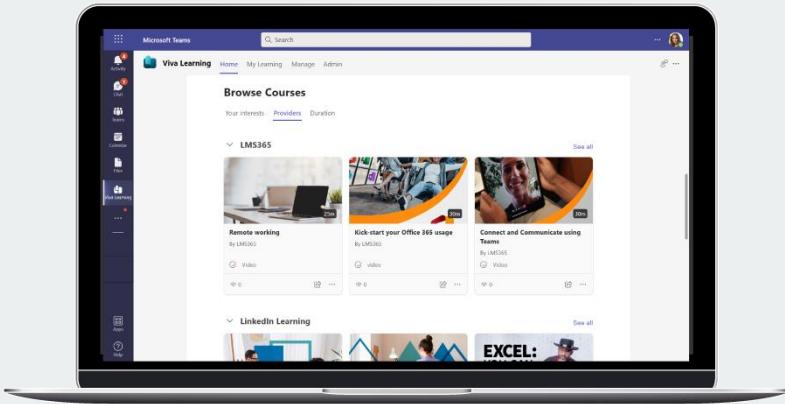

5

Ensuring **career development** program?

# Challenges

A Learning Management System (LMS) can address all or some of these challenges

# Meet LMS365

- ▶ Microsoft recommended cloud-based Learning Management System for modern digital workplaces of all sizes
- ▶ Only learning platform natively **built directly into Microsoft 365**
- ▶ **Deliver learning in multiple modalities** (online, classroom, webinar, blended, peer-to-peer, micro-learning, etc.) in MS Teams, SharePoint; Viva Learning or mobile devices

# Meet LMS365

- ▶ **Easily create and structure courses** using any content from any repository
- ▶ **Create multiple learning portals** with different branding, administrators, rules, audiences, etc.
- ▶ **Certification** management; **Skill** management; **Notification** management; **Quizzing**; Mentoring/coaching, Gamification, **Social learning**, etc.

# Learners access training through their favorite tools

SharePoint

Microsoft Teams

Mobile Devices

Viva Learning

Rich browser-based learning experience through the Intranet or a training portal in SharePoint

Collaborative, social, peer-to-peer, video, chat, voice, in-context learning tools

Full-blown learning experience on any device. Download and complete training offline

Learning in the flow of work, surfacing all learning opportunities

# Demonstration

Leverage a team dedicated for learning

Add learning to a team to support a specific business process

Leverage existing collaboration teams with learning components

Ad hoc mentoring / coaching in Teams
